EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In The Claims

In claim 1, line 7, the recitation "fast" is a typographical error as compared to the specification, replace "fast" with - - fastened - - as cited in the specification.

The following is an examiner's statement of reasons for allowance: independent claim 1 and its dependent claims are allowed because the instant invention discloses a novel rotating dobby for weaving looms. Specifically, the dobby utilizes a mobile coupling member borne by an actuation element, the mobile coupling member subjected to first elastic means to affect the angular link of the actuation element with a disc fastened to the principal shaft. Additionally, the dobby uses two pivoting levers, substantially in the form of a bracket, that is subjected to on the one hand a reading in device and on the other hand a second elastic means for engaging the catch of each pivoting lever, further it requires mechanical members adapted to displace at least one lever, against the action of said second elastic means. The bracket form, the use of an

elastic means to affect the mobile coupling member and the use of a second elastic means to engage the pivoting lever brackets is not shown in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
